Department Overview:

Mission Statement

"To care for him who shall have borne the battle and for his widow and his orphan."

These words, spoken by Abraham Lincoln during his Second Inaugural Address, reflect the philosophy and principles that guide VA in everything we do, and are the focus of our endeavors to serve our Nation's veterans and their families.

Vision

We will strive to meet the needs of the Nation's veterans and their families today and tomorrow by: (1) becoming an even more veteran-focused organization, functioning as a single, comprehensive provider of seamless service to the men and women who have served our Nation; (2) cultivating a dedicated VA workforce of highly skilled employees who understand, believe in, and take pride in our vitally important mission; (3) continuously benchmarking the quality and delivery of our service with the best in business and use innovative means and high technology to deliver world-class service; and (4) fostering partnerships with veterans organizations, the Department of Defense and other federal agencies, state and local veterans organizations, and other stakeholders to leverage resources and enhance the quality of services provided to veterans.

Organization:

VA has three Major Administrations, under which all VA owned property falls:

Veterans Health Administration

With 158 VA medical centers (VAMCs) nationwide, VHA manages one of the largest health care systems in the United States. VAMCs within a Veterans Integrated Service Network (VISN) work together to provide efficient, accessible health care to veterans in their areas. The VHA also conducts research and education, and provides emergency medical preparedness.

Veterans Benefits Administration

VBA provides benefits and services to the veteran population through 58 VA regional offices. Some of the benefits and services provided by VBA to veterans and their dependents include compensation and pension, education, loan guaranty, and insurance.

National Cemetery Administration

NCA is responsible for providing burial benefits to veterans and eligible dependents. The delivery of these benefits involves managing 120 National Cemeteries nationwide, providing grave markers worldwide, administering the State Cemetery Grants Program that complements the National Cemeteries network, and providing Presidential Memorial Certificates to next of kin of deceased veterans.

VA History

The United States has the most comprehensive system of assistance for veterans of any nation in the world. This benefits system traces its roots back to 1636, when the Pilgrims of Plymouth Colony were at war with the Pequot Indians. The Pilgrims passed a law which stated that disabled soldiers would be supported by the colony.

The Continental Congress of 1776 encouraged enlistments during the Revolutionary War by providing pensions for soldiers who were disabled. Direct medical and hospital care given to veterans in the early days of the Republic was provided by the individual States and communities. In 1811, the first domiciliary and medical facility for veterans was authorized by the Federal Government. In the 19th century, the Nation's veterans assistance program was expanded to include benefits and pensions not only for veterans, but also their widows and dependents.

After the Civil War, Congress established the National Home for Disabled Volunteer Soldiers (1865 – 1930) to care for veterans. Eleven branches were established nationwide, and represent the oldest VA owned buildings by virtue of the NHDVS being a predecessor agency. Since domiciliary care was available at all veterans homes, incidental medical and hospital treatment was provided for all injuries and diseases, whether or not of service origin. Indigent and disabled veterans of the Civil War, Indian Wars, Spanish-American War, and Mexican Border period as well as discharged regular members of the Armed Forces were cared for at these homes.

Congress established a new system of veterans benefits when the United States entered World War I in 1917. Included were programs for disability compensation, insurance for servicepersons and veterans, and vocational rehabilitation for the disabled. By the 1920s, the various benefits were administered by three different Federal agencies: the Veterans Bureau, the Bureau of Pensions of the Interior Department, and the National Home for Disabled Volunteer Soldiers.

The establishment of the Veterans Administration came in 1930 when Congress authorized the President to "consolidate and coordinate Government activities affecting war veterans." The three component agencies became bureaus within the Veterans Administration. Brigadier General Frank T. Hines, who directed the Veterans Bureau for seven years, was named as the first Administrator of Veterans Affairs, a job he held until 1945.

The VA health care system has grown from 54 hospitals in 1930, to include 171 medical centers; more than 350 outpatient, community, and outreach clinics; 126 nursing home care units; and 35 domiciliaries. VA health care facilities provide a broad spectrum of medical, surgical, and rehabilitative care. The responsibilities and benefits programs of the Veterans Administration grew enormously during the following six decades. World War II resulted in not only a vast increase in the veteran population, but also in large number of new benefits enacted by the Congress for veterans of the war. The World War II GI Bill, signed into law on June 22, 1944, is said to have had more impact on the American way of life than any law since the Homestead Act more than a century ago. Further educational assistance acts were passed for the benefit of veterans of the Korean Conflict, the Vietnam Era, Persian Gulf War, and the All-Volunteer Force.

In 1973, the Veterans Administration assumed another major responsibility when the National Cemetery System (except for Arlington National Cemetery) was transferred to the Veterans Administration from the Department of the Army. The Agency was charged with the operation of the National Cemetery System, including the marking of graves of all persons in national and State cemeteries (and the graves of veterans in private cemeteries, upon request) as well and administering the State Cemetery Grants Program.

The Department of Veterans Affairs (VA) was established as a Cabinet-level position on March 15, 1989. President Bush hailed the creation of the new Department saying, "There is only one place for the veterans of America, in the Cabinet Room, at the table with the President of the United States of America."

Types of Historic Properties Owned and Maintained:

Historic Properties and Buildings Inventory – Overview:

VA – Entire Department:

Historic Properties: 179
(officially listed or eligible for the National Register)
98 Formally Listed
81 Determined Eligible

Buildings: 1860+ historic "contributing" buildings

Largest Federal Owners of Historic Buildings (based on sq. ft.):

(According to sources at the Advisory Council on Historic Preservation)

1st Department of Defense (Army, Navy, Air Force)

2nd Department of Interior (National Park Service)

3rd U.S. Postal Service

4th Department of Veterans Affairs
(Veterans Health Administration & National Cemetery Administration)

Agency Summaries:

National Cemetery Administration: 95 historic properties

73 Formally Listed on the National Registers (including 59 Civil War era cemeteries nominated under a thematic, multiple property nomination)

22 Determined Eligible for the National Register

84+ Historic Buildings

NCA has surveyed 100% of its land holdings for above-ground significance. The Keeper of the National Register of Historic Places has determined that all national cemeteries are national shrines and potentially eligible for the Register. The remaining cemeteries are considered "potentially eligible" and are treated as

"historic" for management purposes; these need further evaluation and documentation.

These properties are typically national cemeteries, with multiple acres of flat and/or rolling grassy land containing gravestones and monuments, road and walk ways, and enclosed with stone or other material walls and accessed by monumental gates. Many have gatehouse or administrative lodges, including 22 Civil War era lodges designed by Montgomery Meigs.

Veterans Health Administration: 84 historic properties

25 formally Listed on the National Register

59 formally determined Eligible for the National Register

1640+ contributing "historic" buildings

Note that there are some property locations counted more than once (5 are counted twice for different resource reasons and Milwaukee, for example, is counted 3 times – 1 for Listed pre-historic archaeological site, 1 for Listed Ward Memorial Theater, and 1 for remainder for Eligible NHDVS historic district).

VHA has surveyed 100% of its land holdings for above-ground significance. Almost all properties have been evaluated and most have received a formal status as to their eligibility for listing on the National Register. In the early to mid-1980's, the VA sought and received concurrences from all applicable State Historic Preservation Officers that the remaining VA medical centers DO NOT meet criteria for listing on the National Register of Historic Places. Only two exceptions to that are known: St. Cloud, MN and Menlo Park, CA; these need further evaluation.

These properties are typically medical centers in campus-like settings, with multiple buildings on many acres of manicured and landscaped land, either near or in the downtown areas of the cities for which they are named. Principle buildings are often clustered on or near the highest part of the site.

Agency Overviews and Inventories of Historic Properties:

National Cemetery Administration:

MISSION

The National Cemetery Administration (NCA) honors veterans with a final resting place and lasting memorials that commemorate their service to our nation.

Today, there are 136 national cemeteries in all. VA, through its National Cemetery Administration, administers 120 of them. Two national Cemeteries—Arlington and Soldiers Home—are still administered by the Army. Fourteen national cemeteries are maintained by the Department of the Interior.

More than 2.5 million Americans, including veterans of every war and conflict—from the Revolutionary War to the Gulf War—are honored by burial in VA's national cemeteries. More than 14,200 acres of land from Hawaii to Maine, and from Alaska to Puerto Rico are devoted to the memorialization of those who served this nation. More than 300 recipients of the Medal of Honor are buried in VA's national cemeteries.

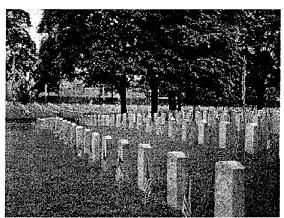

In addition to providing a gravesite and a grave liner, VA opens and closes the grave, provides a headstone or marker, a Presidential Memorial Certificate, a U.S. Flag, and perpetually cares for the grave at no cost to the veteran's family.

NCA STATISTICS

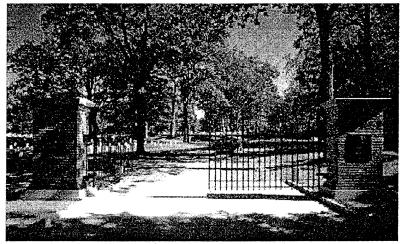

- NCA currently maintains more than 2.6 million gravesites at 120 national cemeteries in 39 states and Puerto Rico, as well as in 33 soldier's lots and monument sites.
- More than 301,050 full-casket gravesites, 58,500 in-ground gravesites for cremated remains, and 37,900 columbarium niches are available in already developed acreage in our 120 national cemeteries.
- There are approximately 14,200 acres within established installations in NCA. Just over half are undeveloped and—with available gravesites in developed acreage—have the potential to provide more than 3.6 million gravesites.
- Of the 120 national cemeteries, 60 are open to all interments; 22 can accommodate cremated remains and family members of those already interred; and 38 are closed to new interments, but may accommodate family members in already occupied gravesites.
- Since 1973, annual interments in VA national cemeteries have doubled from 36,400 to more than 89,750 in FY 2003. Interments are expected to increase annually until the year 2008.
- Of the more than 89,750 interments conducted in FY 2003, 73.5 percent were in the 20 busiest national cemeteries: Riverside (Calif.), Calverton (N.Y.), Florida, Fort Snelling (Minn.), Jefferson Barracks (Mo.), Fort Sam Houston (Texas), Willamette (Ore.), Fort Logan (Colo.), National Memorial Cemetery of Arizona, Houston (Texas), Fort Rosecrans (Calif.), Dallas-Fort Worth (Texas), San Joaquin Valley (Calif.), Tahoma (Wash.), Massachusetts, Abraham Lincoln (III.), Long Island (N.Y.), Indiantown Gap (Pa.), Puerto Rico, and Santa Fe (N.M.), National Cemeteries.
- As of Sept. 30, 2003, six national cemeteries each contained more than 100,000 occupied gravesites, collectively accounting for 34.5 percent of all NCA gravesites maintained: Long Island, N.Y., (241,825); Calverton, N.Y., (153,976); Fort Snelling, Minn., (134,756); Jefferson Barracks, Mo., (120,602); Golden Gate, Calif., (112,035); and, Riverside, Calif., (125,955) National Cemeteries.
 - Largest National Cemetery: Calverton (N.Y.) 1,045 acres.
 Smallest National Cemetery: Hampton VAMC, (Va.) .03 acres.

Oldest National Cemetery: 14 established in 1862 (12 are currently maintained by VA). Newest National Cemetery: Fort Sill opened in November 2001.

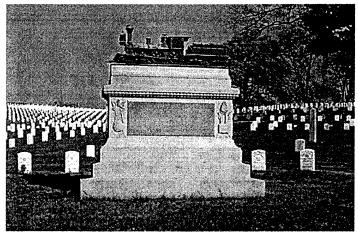

- Volunteers donated approximately 315,200 hours at national cemeteries during fiscal year 2003.
- Over 8.7 million people visited VA national cemeteries in fiscal year 2003.

NR Listed on National Register of Historic Places

NHL National Historic Landmark

DOE Determination of Eligibility for the National Register of Historic Places

These designations are official from the Keeper of the National Register of Historic Places, National Park Service, Department of Interior.

Pot. Elig. Potentially Eligible for listing on the National Register of Historic Places. These properties have not received official certificates from the National Park Service, but are generally considered by VA and State Historic Preservation Officers to be historically significant and require preservation. They need additional evaluation and documentation.

NOTE: For all of these designations, the VA must comply with Sections 110 and 106 of the National Historic Preservation Act of 1966, for all projects and property management decisions that may affect the historic districts.

** Arch. Set One of about 50 properties nationwide that serve as part of the VA's Architectural Set, a thematic, multiple property nomination to the National Register. They share a common prototype floor plan, campus siting/landscaping, and overall health care design strategy; the exterior facades differ regionally by architectural style.

NHDVS One of eleven branches of the National Home for Disabled Volunteer Soldiers, established after the Civil War in 1867 by Congress to care for disabled veterans.

** Civil War One of 59 National Cemeteries established as a direct result of and during the Civil War by Union forces for the burial of soldiers lost in battle.

Civil War

One of many additional National Cemeteries established during or after the Civil

Related

War to bury either Union or Confederate Soldiers. Some were established to bury disabled soldiers

upon their subsequent deaths.

NHDVS

One of eleven branches of the National Home for Disabled Volunteer Soldiers, established after the Civil War in 1867 by Congress to care for disabled veterans. Each branch contained a cemetery area; these cemeteries were brought into the National Cemetery System in 1973.

Military/

These National Cemeteries were established as a direct result of the migration of

Settlers pioneer settlers into the western territories. They are mostly on or near wilderness military forts or

posts that were built and staffed to defend settlers from the Indians.

Typical Components of a Historic Cemetery District:

- λ Entire cemetery property property line is historic district boundary
- λ All early features are "contributing"
 - » Perimeter walls
 - » Gates
 - » Lodges (esp. Meigs)
 - » Artillery
 - » Monuments
 - » Rostrums
 - » Flag Pole and patio areas
 - » Headstones, memorial sculpture

NCA Historic Resources by the Numbers

- 8* Cemeteries designated a National Historic Landmark
- 13 Cemeteries containing burials of foreign-born POWs
- 21 Lodges by QM Gen. M. C. Meigs (1870-87)
- 31 Rostrums (1880-1942)
- 33 Lodges by persons other than Meigs (1877-1949)
- 33 Soldiers'/Government Lots & similar sites—all historic
- 49 Perimeter walls (1860s-1949; esp. 19th century)
- 56 Gates/entries (1860s-1949; especially late 19th c./1930s)
- 71* Cemeteries on the National Register of Historic Places
- 86 Technically *historic* National Cemeteries (about 72%)
- 600+ (est.) Major Memorials/Monuments (1860s-present)
- 400 (est.) Memorial Tablets/Plaques (20th century)

* Numbers being revised

Cemetery Lodges by Meigs:

National Cemetery superintendent's lodges were constructed at numerous Civil War national cemeteries from a prototypical plan, 1860's - 1900's, in different, local materials. The design and construction oversight was done by Brigadier General Montgomery C. Meigs, Quartermaster General of the Army from 1861-62.

- (1) Antietam National Cemetery and Battlefield Site is administered by the U.S. Department of the Interior. The cemetery was established in 1862, but title to the land was not transferred to the War Department until 1877.
- (2) Union Soldiers who died in hospitals near Philadelphia were buried in 7 different cemeteries. These soldiers were disinterred and moved to the present location in 1885.
- (3) U.S. Soldiers' and Airmen's Home and Arlington National Cemeteries are administered by the U.S. Department of the Army.
- (4) These national cemeteries are administered by the U.S. Department of the Interior.
- (5) The remains of 11,700 unknown Union soldiers are buried at Salisbury National Cemetery.
- (6) Fort Lyon, the military post, was established in 1867 (named for Brig. General Nathaniel Lyon, killed in action at Wilson's Creek on Aug. 10, 1861, the first Union general killed in the Civil War). Remains buried in the old post cemetery were moved to Ft. McPherson National Cemetery when the Army the post in 1887. In 1906, the cemetery was reactivated when the U.S. Navy established a tuberculosis hospital for sailors and marines at the site. In 1922, the Veterans Bureau (a predecessor of VA) assumed operation of the Fort Lyon Hospital and Cemetery.
- (7) Wood Cemetery was established on the grounds of the Northwest Branch National Asylum for Disabled Volunteer Soldiers and Dayton was established on the grounds of the asylum's central branch. The Veterans Administration assumed administration of both the facility and cemetery in 1930. It did not become a national cemetery until 1973, when VA assumed responsibility for the National Cemetery Administration.
- (8) Administered by the Veterans Administration beginning in 1973 when national cemeteries administered by the Army were transferred to VA. Became national cemeteries after that date, although they were established earlier. Most of these cemeteries were on the grounds of national homes or asylums for disabled soldiers and sailors.
- (9) Previously an Army post cemetery, reserved for active duty military personnel and their families.
- (10) National Memorial Cemetery of Arizona was established as a State Veterans Cemetery in 1979. It was transferred to the Department of Veterans Affairs in 1989 and became a national cemetery.
- (11) The site of Congressional Cemetery was first set aside as a burial ground by the Vestry of Christ Church in 1808. In 1817, the church reserved 100 gravesites for the interment of members of Congress. Today, NCA is responsible for 469 gravesites in the cemetery. In total, there are 806 government-owned sites. There are 168 cenotaphs in the cemetery that were used to memorialize congressmen who died in office. There are nine Native American Delegate Members buried in the cemetery who died while representing their tribes on delegations to Washington. There are 45 Confederate soldiers buried there as well.
- (12) The remains of 1,616 Confederate prisoners of war who died at Camp Morton in Indianapolis during the Civil War were originally buried in Greenlaw Cemetery. In 1931, their remains were reburied in Crown Hill Cemetery.
- (13) Monument in Union Cemetery erected to 15 Confederate prisoners of war who died in Kansas City and are buried in the cemetery as unknowns.
- (14) Monument in Woodlawn Cemetery erected in memory of 11 Confederate prisoners of war who died in Terre Haute and whose graves in the cemetery cannot be identified.

Veterans Benefits Administration:

VBA owns or controls only one known historic building and it is generally joined in the listings for all VHA property, as it sits isolated in the middle of VHA property at the medical center at Hines, Illinois. It is:

Building 21, used for storage. Formerly one of two buildings that served as an airplane hanger at the Checkerboard Airfield, from where Charles Lindbergh inaugurated airmail postal service from Chicago to St. Louis.

Since the lone VBA building sits in the middle of a medical center campus, adjacent to its twin VHA building, the building is included in all data related to VHA.

The remainder of this report will refer only to National Cemetery and Medical Center properties.

Veterans Health Administration (VHA):

VHA Mission Statement

The mission of the Veterans Healthcare System is to serve the needs of America's veterans by providing primary care, specialized care, and related medical and social support services. To accomplish this mission, VHA needs to be a comprehensive, integrated healthcare system that provides excellence in health care value, excellence in service as defined by its customers, and excellence in education and research, and needs to be an organization characterized by exceptional accountability and by being an employer of choice.

The Office of the Under Secretary for Health provides oversight of the Veterans Health Administration (VHA), the largest integrated health care provider in the nation. In addition to the oversight responsibilities regarding VHA's field facilities and the 21 Veterans Integrated Service Networks (VISNs) that manage their activities, the Office exercises oversight of VHA program responsibilities headquartered in VA Central Office.

Typical Components of a Historic Medical:

- λ Entire property property line is historic district boundary
- λ All early features are "contributing"
 - » Principle hospital patient buildings
 - » Recreation Buildings
 - » Quarters
 - » Engineering and Support Buildings
 - » Flag Pole
 - » Original/mature landscaping and hardscape features
 - » Other Buildings as mentioned under NHDVS, below:

Listing by Resource Type and/or Establishment Date:

VHA properties fall into several distinct categories:

- National Home for Disabled Volunteer Soldiers 11 former Branches
- Architectural Set Properties:
- Architectural Design
- Unusual or Odd Properties
- Former Military Properties

National Home for Disabled Volunteer Soldiers: Most buildings remaining from use by the VA's predecessor agency, The National Home for Disabled Volunteer Soldiers (1865 – 1930). In particular, the following building types are most significant:

- Theaters
- Chapels
- Libraries
- Bandstands

- Barracks
- Mess Halls
- Unique Quarters, especially the Commandant's/Director's
- Administration/Headquarters buildings
- Odd or unique buildings, like former morgues, greenhouses, etc.

Those sites are:

The Eastern Branch	Togus, Maine	1867
The Northwestern Branch	Milwaukee, Wisconsin	1867
The Central Branch	Dayton, Ohio	1867
The Southern Branch	Hampton, Virginia	1870
The Western Branch	Leavenworth, Kansas	1885
The Pacific Branch	Santa Monica (LA), California	1888
The Marion Branch	Marion, Indiana	1888
The Danville Branch	Danville, Illinois	1898
The Mountain Branch	Johnson City, Tennessee	1901
The Battle Mountain Sanatorium	Hot Springs, South Dakota	1902
The Bath Branch	Bath, New York	1929
(formerly New York State Soldiers & Sailor Home, est. 1877)		

Architectural Set: The buildings from 50 properties nationwide that serve as part of the VA's Architectural Set, a thematic, multiple property nomination to the National Register. They share a common prototype floor plan, campus siting/landscaping, and overall health care design strategy; the exterior facades differ regionally by architectural style, many in fanciful revival styles. Each location varies, but the most important buildings on those sites tend to be:

- Principle, main, large building, generally with a cupola or other tower structure in the middle near the traditional main entrance; also usually has a large front yard with vista from the public street
- Recreation Hall
- Director's Single Quarters; duplex staff quarters

Those sites are:

VAMC Location	Architectural Style	<u>Date</u>
Alexandria, Louisiana	French Colonial Revival	1929
Amarillo, Texas	Spanish Colonial Revival	1939
American Lake, Washington	Spanish: Neo-Pico	1923
Batavia, New York	Georgian Colonial Revival	1932
Bath, New York	Georgian Colonial Revival	1938
Battle Creek	Georgian Colonial Revival	1924
Bay Pines, Florida	Churriguerresque	1924
Bedford, Massachusetts	Georgian Colonial Revival	1928
Biloxi (BD), Mississippi	Late Southern Colonial Revival	1932
Biloxi (GD), Mississippi	Spanish Colonial Revival - Spanish Baroque	1923
Brockton (West Roxbury), Mass.	Georgian Colonial Revival	1943
Canandaigua, New York	English Tudor - Jacobethan	1932
Chillicothe, Ohio	Georgian Colonial Revival	1923
Coatesville, Pennsylvania	Georgian Colonial Revival	1930
Columbia, South Carolina	Georgian Colonial Revival	1932
Dallas, Texas	Georgian Colonial Revival	1940
Des Moines, Iowa	Georgian Colonial Revival	1933
Fayetteville, Arkansas	Georgian Colonial Revival	1933
Fayetteville, North Carolina	Georgian Colonial Revival	1939
Fort Howard, Maryland	Georgian Colonial Revival	1943

Hampton, Virginia	Georgian Colonial Revival	1937
Hines, Illinois	Georgian Colonial Revival	1922
Huntington, West Virginia	Georgian Colonial Revival	1932
Indianapolis (CSR), Indiana	Georgian Colonial Revival	1931
Lebanon, Pennsylvania	Georgian Colonial Revival	1947
Lexington (LD), Kentucky	Georgian Colonial Revival	1930
Lincoln, Nebraska	Georgian Colonial Revival	1929
Little Rock (NLRD), Arkansas	Georgian Colonial (demolished?)	
Lyons, New Jersey	Georgian Colonial Revival	1929
Marion, Illinois	Egyptian Revival	1940
Montgomery, Alabama	Georgian Colonial Revival	1939
Montrose, New York	Georgian Colonial Revival	1949
Murfreesboro, Tennessee	Federal Revival	1939
Newington, Connecticut	Georgian Colonial Revival	1930
Northampton, Massachusetts	Georgian Colonial Revival	1923
Northport, New York	Georgian Colonial Revival	1927
Perry Point, Maryland	Georgian Colonial Revival	1919
Pittsburgh (AD), Pennsylvania	Georgian Colonial Revival	1925
Roseburg, Oregon	Georgian Colonial Revival	1933
Salem, Virginia	Georgian Colonial Revival	1933
San Francisco, California	Art Deco	1934
St. Cloud, Minnesota	Georgian Colonial Revival	1923
Sheridan, Wyoming	Georgian Colonial Revival	1945
Tomah, Wisconsin	Georgian Colonial Revival	1946
Tuscaloosa, Alabama	Georgian Colonial Revival	1931
Waco, Texas	Italian Renaissance Revival	1932
W. Los Angeles, California	Spanish Colonial Revival	1920
White River Junction, Vermont	Georgian Colonial Revival	1938
Wichita, Kansas	Georgian Colonial Revival	1933

Architecturally Important: Four sites built within the timeframe of the Architectural Set, but prototype design was not used. Noted for outstanding revival architecture influenced by host community. Main buildings, courtyard areas, theaters, and quarters at:

Albuquerque. New Mexico	Pueblo Revival Style	1932
Chevenne, Wyoming	Prairie Style	1932
Sioux Falls, South Dakota	Gothic Revival	1948
Tucson, Arizona	Spanish Mission Style	1928

Unusual Sites or Buildings:

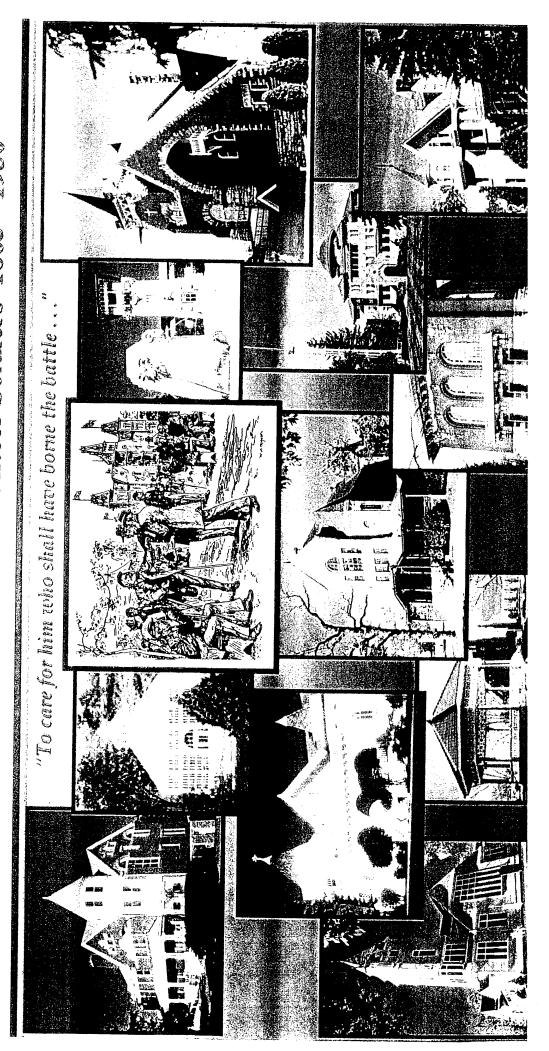

Ashville, North Carolina Augusta (Lenwood), Georgia Brockton, Massachusetts Bronx, New York	Old Oteen Hospital Buildings, #1 & Quarters Three Old Convent/Hotel Bldgs. Quarters Building 60 Chapel	1931 1913
Cleveland (Brecksville), Ohio	Quarters Building 62	1846
Hines, Illinois Knoxville, Iowa	Checkerboard Airfield Lindbergh Supply Depots 2 Bldgs. School for Blind & Home for Inebriates	1905
Lebanon, Pennsylvania	Pennsylvania Dutch Farm Houses	1935
Manchester, New Hampshire	Gothic Stone Tower	1888
Minneapolis, Minnesota North Chicago, Illinois	Fort Snelling Quarters Dewey House	1914
Paris, France	Pershing Hall	1880

Perry Point, Maryland	Mansion and Mill	1750
Salem, Virginia	Mount Airy Estate Home and Pool	1835
Togus, Maine	Governor's House National Historic Landmark	1865
Tomah, Wisconsin	17 Indian School Buildings	
Tuskegee, Alabama	Black History Buildings	1923

Former Military Posts: The most important buildings at these sites vary depending on the nature, layout and history of the site, but typically barracks buildings, quarters, mess halls, etc., are important.

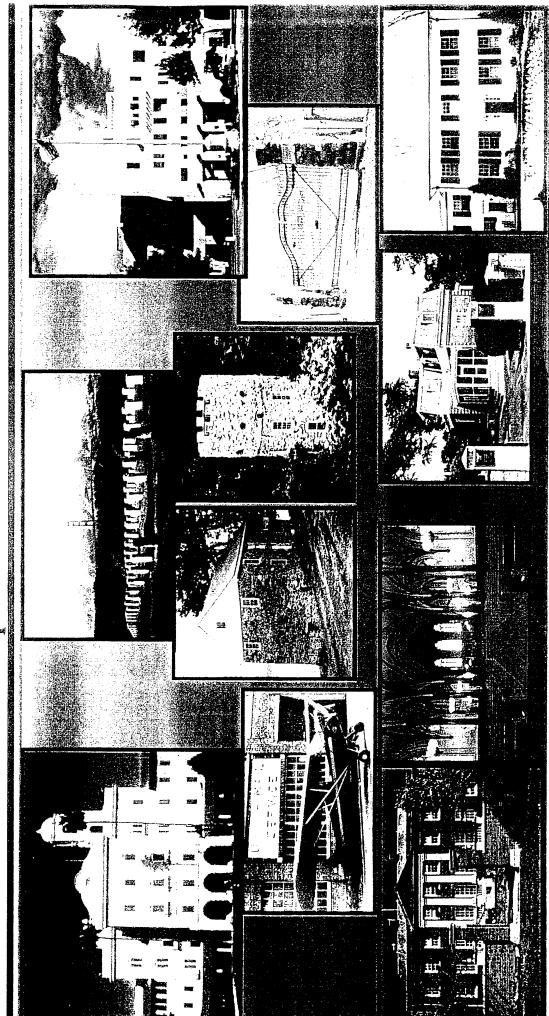

VAMC Location	Original Military Name	<u>Date</u>
Boise, Idaho	Fort Boise	1863
Cincinnati, Ohio	Fort Thomas	1890
Fort Harrison, Montana	Fort Harrison	1892
Fort Howard, Maryland	Fort Howard	1899
Fort Lyon, Colorado	Fort Lyon	1860s
Fort Meade, South Dakota	Fort Meade	1891
Little Rock (NLRD), Arkansas	Fort Logan Roots	1896
Minneapolis, Minnesota	Fort Snelling	1921
Prescott, Arizona	Fort Whipple	1863
Sheridan, Wyoming	Fort MacKenzie	1898

National Home for Disabled Volunteer Soldiers 1865-1930

Architectural Set 1921 - 1947

Unique Historic Resources

Distribution:

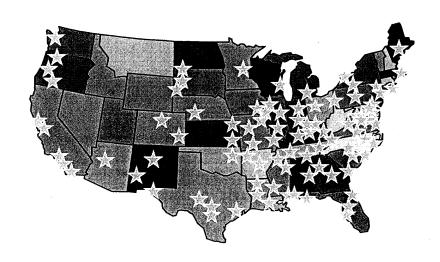

VA's Historic Medical Center Districts are all over the continental United States:

75 Historic Districts 31 Archeological Sites 1640+ Historic Buildings

VA's Historic National Cemeteries are all over the continental United States:

86 Historic Cemeteries (8 are Landmarks) 85 Historic Structures (Lodges and Rostrums) 600+ Monuments 400+ Sizable Plaques

Reporting & Systems Methodology Used for Assessment:

Inventory and Evaluations:

Ongoing since 1973, VA has taken a close look at properties and evaluated them against National Register of Historic Places criteria for listing. VA appointed a Historic Preservation Officer in 1973. Originally, letters were sent to every facility, asking them to assess their properties and send in their self-assessments, along with facility histories. Thematic patterns immediately emerged. By follow-up letters, facilities were required to photograph every structure on their property, keyed to site plans. In the late 1970's, an architect was added to the staff to evaluate the historic buildings and develop the thematic groups of historic properties. After cursory documentation all apparent historic properties had been submitted to the respective State Historic Preservation Officers and the Keeper of the National Register of Historic Places, VA had a healthy and comprehensive list of "eligible" properties.

To assist with planning and management of facilities, the Historic Preservation office followed up with documentation and analysis on the remaining VA-owned properties, to gain concurrences that these properties were not historic and did not meet criteria for listing on the National Register. So, by the mid-1980's VA had "negative determinations of eligibility" on the remainder of properties. The result greatly helped planners. Projects at those sites did not require any further compliance actions. Staff efforts and planning focused on the legally "historic" properties.

Assessments:

Through the years, various facility management studies and reports have added to the body of information that we have on the properties. Occasionally, a previously "ineligible" property would emerge with a significance that would qualify it for "listing." These reports also consistently gave feedback on the existence and status of the inventoried historic buildings. These studies included:

- Facility Development Plans
- Five Year Plans
- Facility Condition Assessments
- Capital Asset Reporting Plans
- · Capital Assets and Realignment for Enhanced Services

In all cases, these studies reported on the existing condition of the buildings, the future needs for continuing to use the structures, the estimated costs to bring buildings up to standards and codes, and options for use or reuse. VA was and continues to be very pro-active in studying the properties.

Today and Future:

A few properties having now reached the age of 50 need re-evaluation. See Section "Future Actions to Comply with Sections 110 and 111"

Annual Heritage Asset Report as part of Financial Statement to Congress:

All historic properties, with lists of individual historic buildings, are listed on the VA website: http://www.va.gov/facmgt/historic/Inventory Home.asp

Every facility is required to review their listing annually and report by e-mail any changes or discrepancies to the Federal Preservation Officer. Legitimate changes are made to website and master Capital Asset data base. A Summary Report is included as VA's "Heritage Assets" in the Department's Annual Financial Report to Congress.

General Conditions and Management Needs:

National Cemetery Administration:

The National Cemetery properties are well maintained. Many are still active and have daily burials. The grounds are mowed and landscaped. Damaged or deteriorated headstones are replaced, in-kind, as needed.

The Civil War era cemeteries have additional inherent maintenance burdens. Many are enclosed with original stones walls and monumental entrance gates, which require rehabilitation. Though generally in good condition, some still need work.

Meigs Lodges and later lodges are also fairly well maintained. Some have been or are projected to be renovated. Some are vacant and holding up to deterioration in various degrees of success.

Veterans Health Administration:

All historic properties are actively used as medical centers, however, many of the listed or eligible properties have vacant buildings that have been identified during the recent CARES process. In general, all occupied and used historic buildings are in excellent condition. The standout buildings that typically are vacant and have no or little use in today's medical care environment, are those stand-alone buildings that completed the old National Home communities and provided residents with full amenities. It could be said that these buildings have suffered varying amounts of neglect, sustained vacancies, and patterns of deferred maintenance. These include:

- Chapels
- Theaters
- Recreation Halls
- Mess Halls
- Barracks
- Bandstands
- Greenhouses
- Libraries
- Quarters
- Odd structures acquired in a variety of ways: Scottish watchtower, mill, military post gates, barracks, etc.

These structures are masterpieces of revival architecture and are some of the most valued historic treasures owned by the department. However, as these buildings no longer serve a role in today's health care model, many are vacant and unused. Without a dedicated purpose to supplement medical care, they don't receive preservation funding through the priority process in formulating the construction budget. They represent VA's most endangered buildings.

Future:

There is a huge amount of current and anticipated downsizing, as medical care shifts from inpatient to outpatient care. The larger tertiary care hospitals, especially the historic campus models, are no longer the primary method of providing medical care to veterans; the large mega-structure modern hospitals are still used, but not fully, to care for only the most critical of patients, while the older historic campuses, with scattered smaller buildings, are not useful for today's programs, other than supplemental. Today, the focal point for that care is getting more and more widespread into smaller communities, closer to the veterans. VA is opening dozens of community-based clinics in small towns and rural areas, to have outpatient doctor's care within a few miles of the veterans.

Budgeting and Funds:

All VA construction and maintenance projects compete for Congressional funding. Projects are submitted for prioritization, which is based on factors that favor benefits to the veteran, whether through medical care, benefit services, or burial benefits; it does not favor preservation for preservation's sake. Separate funding is needed to assist in preserving under-utilized, but treasured buildings.

Reporting Mechanisms and Systems:

Annual Heritage Asset Report as part of Financial Statement to Congress:

All historic properties, with lists of individual historic buildings, are listed on the VA website: http://www.va.gov/facmgt/historic/Inventory Home.asp

Every facility is required to review their listing annually and report by e-mail any changes or discrepancies to the Federal Preservation Officer. Legitimate changes are made to website and master Capital Asset data base. A Summary Report is included as VA's "Heritage Assets" in the Department's Annual Financial Report to Congress.

Capital Asset Data Base:

VHA's Office of Facilities Management maintains the entire Department's listing of all facilities, buildings, monuments, etc. Every facility has one person designated to make changes to the data base to ensure it is up-to-date. The exception to that procedure is that only the Federal Preservation Officer has the ability to change any fields in the historic information section of the data base. This ensures that someone does not arbitrarily delete historic status of a building or facility. This data base was and still is integrally used with the CARES studies.

CARES Studies:

Capital Asset Realignment for Enhanced Services (CARES) is a completed national study of all future facility needs. Projected veteran data was combined with medical care useage to assess whether current medical facilities were aligned to meet future health care needs of veterans for the next twenty years. As part of the data gathering, the conditions of buildings were noted in great detail. That data is the basis for the general summary conclusions of their current general condition.

All future facility management decisions will be made based on the results from CARES. Programs may be shifted from one location to another. Larger facilities may be downsized; some facilities may be closed. All actions of this nature are handled through the construction project process. Projects are submitted up to five years in advance, weighted and scored by central planning staff, and submitted in annual budgets to Congress for funding.

Fulfillment of Section 110 Responsibilities:

All historic properties, with lists of individual historic buildings, are listed on the VA website: http://www.va.gov/facmgt/historic/Inventory Home.asp

100% property surveyed for Buildings and Structures

In early 1980's, VA sought and received DOE or Neg. DOE on almost all property. Only two medical center campus remain unresolved: Menlo Park and St. Cloud.

There is not an ongoing effort to convert the determinations of eligibility into formal nominations. This is due to lack of staff and funds. Staff time is more focused on encouraging the preservation of the already identified historic resources. However, whenever there is a major construction or Enhanced Use Lease project at an "eligible" site, we try to build into the mitigation measures a stipulation that requires that project funds or lessee funding be used to prepare a formal nomination for that property.

For about 10 years in the mid-1980's to the mid-1990's, VA had on staff an archaeologist. They travel to the sites and surveyed many hundreds of acres on dozen's of properties. Additionally, using document research and topo maps, they further identified properties or areas of properties that had a higher likelihood of containing archaeological resources. Using this information, VA attempts to avoid high areas and when necessary, hires an archaeologist to conduct field research and/or to be present for ground-disturbing activities.

Compliance with Section 111 for Properties leaving VA Control:

Ensuring preservation:

When transferring properties outside of VA control, through transfer of deed or lease, VA generally adds a covenant to the deed or lease that essentially transfers the basic Federal preservation requirements to the new owner or lessee – basic consultation with the SHPO on future undertakings. For Leases, the dispute resolution would re-involve VA.

For Enhanced Use Lease projects, where a developer takes over control of the property for up to 75 years, VA transfers the Federal preservation responsibilities over to the lessee.

Future Actions to Comply with Sections 110 and 111:

Nominations to the National Register:

Continue efforts to have "eligible" properties nominated to the National Register of Historic Places. This is typically added as a mitigation measure in negotiated agreements for projects at the property. That is the primary means of obtaining funding.

National Park Service Partnership:

Have just recently signed an Interagency Agreement with the National Park Service, Midwest Region, for the NPS to conduct National Landmark Study of the eleven VA properties - former branches of the National Home for Disabled Volunteer Soldiers. Properties deemed worthy will be nominated for Landmark status. This study will increase knowledge of the properties, raise public and employee awareness and assist management in decisionmaking.

Archaeology:

Enlist the services of an archaeologist to continue surveying VA property, ranking the probability of finding resources, and conducting more intensive testing on potential sites.

Increase knowledge of potential historic properties:

Re-evaluate buildings that have since turned 50 years old, including the post WWII era buildings:

Post WWII - VA Designed 500 Bed Hospitals:

To serve the many veterans needing care after World War II, the VA undertook a massive program of building in many places around the country another prototype hospital which we now call the "Bradley 500 Bed Hospital" in reference to then VA Administrator Omar Bradley and the approximate number of beds in the design. The number of actual beds varied slightly to accommodate the site or other variables. Due to the need for getting these buildings in use quickly, they are austere and lack architectural embellishment.

Hospitals Constructed by the Corps of Engineers: February 1946 - May 1954

In the early Fall of 1945, General Omar Bradley, VA Administrator, decided to request the Corps of Engineers (OCE or Corps) assistance in building hospitals needed for the VA post-World War II expansion which Congress had already approved and funded. The Corps began work for the Veterans Administration February, 1946, after receiving official approval to do so that month. After eight years of work, the Corps completed the program in May 1954. The Corps and its contractors constructed 44 complete hospitals in those years at a cost of \$364,184,828. in A/E and construction expenses. OCE handled the design features while the field handled actual construction. All divisions of the Corps were involved. Within OCE, the Hospital Branch of Construction Operations Division authorized the funds and generally supervised the construction phase and the Projects Control Section of Engineering Division coordinated design, specifications and engineering phases to the actual point of the invitation to bid. Problems with lack of specialized personnel and the necessary decision authority soon led to establishment of the Hospital Design Branch in the Summer of 1947. But the number of Corps employees involved cannot be readily determined.

Hindrances to Contribute to Community Economic Development - Tourism:

With only a few exceptions, VA properties are not good candidates for Community Economic Development or Heritage Tourism.

National Cemeteries Centers:

<u>Tourist Interest Cemeteries</u>: A few of VA's national cemeteries have tourism interest, most principally The National Memorial Cemetery of the Pacific, Honolulu, Hawaii, as it rests in the crater of a dormant volcano, has memorials relating to the World War II, contains famous burials from WWII, and has a fabulous overlook area on the rim of the volcano that overlooks all of downtown Honolulu and Pearl Harbor below.

Like it, others with tourist interest are open and available for visitors, but there is no great effort to attract visitors or tourists. There is no opportunity, nor is there a desire to develop commercial enterprises in VA's cemeteries. To do so would detract from the solemn and sacred nature of them.

More Remote Cemeteries: Many historic VA cemeteries are closed or mostly closed to future burials. Some have been closed for decades, while others still accept reserved burials or spouse burials. Many no longer have any staff on-site, but are maintained by nearby active cemetery staff, nearby medical center staff, or by private contract. Again, visitors are welcome, but unless someone has a respectful reason to be there, people are not encouraged to wander in the cemeteries, in order to deter vandalism.

VA Medical Centers:

<u>Self-contained Campuses</u>: Most VA medical centers are contained campuses within or on the outskirts of larger communities – cities and towns. They are typically fenced and now, more and more, manned with security measures, that discourage free interaction with the community.

Security: VA management does not typically seek to bring unnecessary visitors on to the campus. Staff, patients, and patient visitors are welcome, in addition to vendors providing services and support. VA does not typically produce events designed to bring the public on to the facility grounds. When there is an event, it is well controlled. A few medical centers have developed Museums or other historical displays, of which they are rightly proud. They welcome interested visitors who learn about their displays, but do not actively seek "tourists" or ever envision becoming a tourist destination. Flocking tourists would not be proper in a medical healing environment.

<u>Budgets</u>: VA does not have discretionary funds to assist with community development outside of VA programs. Funds are channeled to the primary mission of medical care for veterans.

Bottom Line:

VA does not encourage visitors on campuses, cemeteries or medical centers, unless they are there to receive services or for legitimate visits (graves, patients). In today's scenario, security is becoming a major, over-riding concern and future planning may inhibit random community visitors from the campuses. This will only continue to hinder any potential community economic development.

Programs and Policies to Promote Preservation Partnerships:

American Veterans Heritage Center:

VA has established a collaborative relationship with a non-profit group, the American Veterans Heritage Center, advocating the preservation of first, the Dayton VA medical center as a former branch of the NHDVS, the other ten NHDVS branches and ultimately, all historic properties in VA stewardship.

Interagency Agreement with the National Park Service

We have obtained the Secretary's signature on an Interagency Agreement between VA & The National Park Service for a Landmark Study in which:

- National Park Service agrees to conduct National Landmark Study of the eleven VA properties - former branches of the National Home for Disabled Volunteer Soldiers
- VA obtains Benefits:
 - Formalizes a beneficial relationship with long-term potential.
 - Public relations benefits
 - Increases knowledge of property; assists in management decisionmaking
 - No cost to VA (NPS staff travel is subsidized by the American Veterans Heritage Center)

National Preservation Stakeholders Agreement on CARES:

VA has drafted a Memorandum of Understanding (MOU) with preservation stakeholders for integrating the Secretary's CARES Decisions (pending policy decisions). This document will be developed further and used as a tool to network with these organizations, such as the National Trust for Historic Preservation, National Conference of State Historic Preservation Officers, and the Advisory Council on Historic Preservation.

Enhanced Use Lease Program

Enhanced Use Lease Program IS a program of partnerships and represents the best opportunities for revitalizing and reusing historic buildings or properties that are currently or projected to be vacant or under-utilized. More about the program:

VA's Enhanced-Use Leasing authority is the Department's unique asset management program. The program provides VA with a proven method of leveraging VA's diverse real estate portfolio and market position to:

- Realign under-performing property to produce assets capable of yielding "highest and best" return to veterans, taxpayers, and the Government
- Implement business goals and objectives

VA land and buildings traditionally have been acquired and managed as operating overhead burdening the bottom line. In contrast, Enhanced-Use program and products are designed to allow VA activities to:

- Manage and develop VA property holdings as a portfolio of assets
- Generate local revenue, maximize value, minimize costs, and maintain competitiveness
- Provide security needed to attract outside investments
- Realign under-used property to increase operational returns without going through complex and time consuming "excess" property regulations and procedures
- · Acquire needed facilities, space, or services otherwise unaffordable or unavailable
- Link real estate activities to strategic goals

The program, initially authorized in 1991 (38 U.S.C. 8161, et seq.), was <u>recently modified</u> and re-authorized until 2011. Initial results include significant cost savings, substantial private investment, new long-term sources of revenues as well as jobs or tax revenues for the local, state, and Federal sectors.

Review of Policies and Procedures for compliance with Section 110 and 111:

VA has a master policy, Directive 7545, that mandates compliance with all Federal preservation requirements, establishes responsibilities, directs each affected program and facility to have a trained "cultural resources management officer" who is in a position to influence decision-making about the resource and to develop a preservation plan for the facility or program. The goal is to decentralize the preservation process and accountability as well as infuse preservation into the local facility's management culture.

This policy was modeled after a draft policy developed by a consultant to the Department of Defense's Legacy Program in the early 1990's. The companion Handbook 7545, Cultural Resource Management Procedures, gives details on how to implement the policy, basically how to comply with the National Historic Preservation Act and implementing regulations, but a whole host of other statutes, as well. The Appendices provide sample documents for assistance. A re-look at these documents shows that in effect, the policies are fine.

The one piece missing is the accountability. There is no mechanism for the Federal Preservation Officer, or anyone else, to ensure that the facilities and program offices are complying with the Directive. There are no reporting processes or approval process.

Plans are underway to improve accountability. Amendments to the Directive, as well as separate orders, will require facilities to report on who their CRMO official is, the training received, to communicate with headquarters more frequently, to submit an annual report on Section 106 and other compliance activities, and to develop and share their preservation plan, which will be further defined.

Qualifications of Staff:

Dennis "Max" Lewis

Senior Preservation Official

Currently: Assistant Deputy Under Secretary for Operations and Management Former director of the Hines VA medical center; long career with VA; background in engineering.

Karen Ronne Tupek

Federal Preservation Officer (Title outside of VA) Historic Preservation Officer (Title inside VA) Architect

Karen Ronne Tupek, an architectural graduate of Washington University in St. Louis, is the Department of Veterans Affairs' Historic Preservation Officer, located within the Veterans Health Administration's Office of Facilities Management.

In her thirty year career with VA, Karen has spent 22 years in the preservation office, learning preservation from the ground - up, before there were formal university programs. She also worked with medical facility design, handicapped accessibility issues, and state owned veterans nursing homes. Through government sponsored classes, seminars, preservation officer meetings, and conferences, she has been involved with and informed about the evolving field of preservation and cultural resource manage. As the VA's preservation advocate, she has been closely involved in every aspect of the program in the facilities arena: identifying, evaluating and nominating eligible VA properties to the National Register of Historic Places; directing specific design details on construction projects, to contracting archeologists; writing and reviewing historic assessments; directing compliance with Section 106 and writing agreement documents; providing training on preservation requirements to field and central personnel; lecturing on VA history; and writing VA-wide policy.

Karen has designed the VA's preservation website, as well as several historic and architectural exhibits, including a section of the National Veterans Museum in New York, one on geography for the Society of Woman Geographers, as well as given many talks on handicapped accessibility, cultural resource management, preservation design, and VA history and architecture. She served on the Task Force to design and create a new National Veterans Museum in downtown Washington.

Steve Kuper

Program Analyst

Involved in various aspects of construction, facilities management, and budgeting programs for VA for many years. Most recently, Steve served on the team developing CARES, so he is instrumental in working with projects to ensure they incorporate and comply with preservation requirements and goals.

Capital Asset Managers for each VISN. They have been trained on basic preservation considerations and requirements as well as how to comply with Section 106. They will have some responsibility for ensuring projects within their VISN are in compliance with preservation requirements. Further, more in depth training would be encouraged.

Up to 75 staff with collateral title of "Cultural Resource Management Officer" at most historic medical center facilities. They are primarily located in the Engineering Offices and have preservation only as a collateral duty.

Future Planning

'As Stewards of many historic treasures VA is responsible for ensuring that the most important ones are there for future generations'

- CARES Report

Historic Preservation Program's Accomplishments – Last 6 Months:

- Met with National Preservation Stakeholders for Future Policy Guidance
- Drafted a Memorandum of Understanding (MOU) with preservation stakeholders for integrating the Secretary's CARES Decisions (pending policy decisions)
- Trained Capital Asset Managers, at field locations, in what is required for projects and sites that have historic properties or buildings
- Developed a comprehensive list of properties most affected by CARES
- Responded to need for a historic preservation succession plan by bringing in new staff to train and assist with the program
- Obtained Secretary's signature on an Interagency Agreement between VA & The National Park Service – Landmark Study

Planned Future Actions:

Establish a National Advisory Board for Historic Preservation:

Address the need for obtaining support for decisions made in the Historic Preservation Program by establishing a National Advisory Board

Invite participation from VA's trunk organizations; VSO's, National Preservation Groups and partner with other Government Agencies:

- National Trust for Historic Preservation
- Advisory Council on Historic Preservation
- National Conference of State Historic Preservation Officers
- Paralyzed Veterans of America (interested)
- Department of Housing and Urban Development (offered assistance)
- National Park Service

Establish a National Advisory VA Task Force for Historic Preservation:

Address the need for coordinating efforts to implement actions across VA offices in the Historic Preservation Program by establishing a National Task Force –

Invite participation from VA's trunk organizations;

- Veterans Health Administration
- Veterans Benefits Administration
- National Cemetery Administration
- Management and Policy Offices

- Public Affairs
- Congressional Affairs

Identify need for Revolving Fund for Preservation

- Fund for Preservation Projects Alone
- Fund for National Study of Historic Properties
- Education and Training reinforce and supplement

Develop a Strategic Vision to Address CARES Recommendations

Address implementing a vision that recognizes the important properties and buildings in VA's capital inventory

Use a mix of internal and external resources to study the important sites to invest in; and Evaluate the list of "Hot Historic Properties from CARES" based on the results of CARES and include input from other studies, organizations to refine the list into a national priority one. Consider using consultants to objectively validate the list. Use the following list as a baseline (addressed during CARES PHASE 2)

Develop inventory of excess historic buildings based on approval of CARES report. There were 173 buildings identified (See Appendix B)

Incorporate "Section 106" compliance (consultation and negotiations with preservation stakeholders) requirements into implementation plans

Actively seek "preservation stakeholder" assistance to find uses for excess historic buildings or agree on disposition: Work with the following preservation and veterans stakeholders:
